

FEATURES

- Dual Device Module
- Electrically Isolated Package
- Pressure Contact Construction
- International Standard Footprint
- Alumina (non-toxic) Isolation Medium

APPLICATIONS

- Motor Control
- Controlled Rectifier Bridges
- Heater Control
- AC Phase Control

VOLTAGE RATINGS

Type Number	Repetitive Peak Voltages		Conditions
	V_{DRM}	V_{RRM}	
MP03/130-20	2000		$T_{vj} = 125^{\circ}\text{C}$ $I_{DRM} = I_{RRM} = 30\text{mA}$ $V_{DSM} \text{ \& } V_{RSM} =$ $V_{DRM} \text{ \& } V_{RRM} + 100\text{V}$ respectively
MP03/130-18	1800		
MP03/130-16	1600		

Lower voltage grades available. For full description of part number see "Ordering Instructions" on page 3.

CURRENT RATINGS - PER ARM

Symbol	Parameter	Conditions	Max.	Units	
$I_{T(AV)}$	Mean on-state current	Halfwave, resistive load	$T_{case} = 75^{\circ}\text{C}$	134	A
			$T_{case} = 85^{\circ}\text{C}$	112	A
			$T_{heatsink} = 75^{\circ}\text{C}$	114	A
			$T_{heatsink} = 85^{\circ}\text{C}$	95	A
$I_{T(RMS)}$	RMS value	$T_{case} = 75^{\circ}\text{C}$	210	A	

KEY PARAMETERS

V_{DRM}	2000V
I_{TSM}	4000A
$I_{T(AV)}$ (per arm)	134A
V_{isol}	2500V

CIRCUIT OPTIONS

Code	Circuit
HBT	
HBP	
HBN	

PACKAGE OUTLINE

Module type code: MP03.
See Package Details for further information.

MP03 XXX 130 Series

SURGE RATINGS - PER ARM

Symbol	Parameter	Conditions	Max.	Units
I_{TSM}	Surge (non-repetitive) on-state current	10ms half sine; $V_R = 0$ $T_j = 125^\circ\text{C}$	4000	A
		$V_R = 50\% V_{RRM}$	3200	A
I^2t	I^2t for fusing	10ms half sine; $V_R = 0$ $T_j = 125^\circ\text{C}$	80000	A^2s
		$V_R = 50\% V_{RRM}$	51200	A^2s

THERMAL & MECHANICAL RATINGS

Symbol	Parameter	Conditions	Max.	Units
$R_{th(j-c)}$	Thermal resistance - junction to case per Thyristor or Diode	dc	0.21	$^\circ\text{C/W}$
		halfwave	0.22	$^\circ\text{C/W}$
		3 phase	0.23	$^\circ\text{C/W}$
$R_{th(c-hs)}$	Thermal resistance - case to heatsink per Thyristor or Diode	Mounting torque = 5Nm with mounting compound	0.05	$^\circ\text{C/W}$
T_{vj}	Virtual junction temperature		125	$^\circ\text{C}$
T_{sto}	Storage temperature range		-40 to 125	$^\circ\text{C}$
V_{isol}	Isolation voltage	Commoned terminals to base plate AC RMS, 1min, 50Hz	2.5	kV

DYNAMIC CHARACTERISTICS

Symbol	Parameter	Conditions	Max.	Units
V_{TM}	On-state voltage	At 450A, $T_{case} = 25^\circ\text{C}$ - See Note 1	1.90	V
I_{RRM}/I_{DRM}	Peak reverse and off-state current	At V_{RRM}/V_{DRM} , $T_j = 125^\circ\text{C}$	30	mA
dV/dt	Linear rate of rise of off-state voltage	To 60% V_{DRM} , $T_j = 125^\circ\text{C}$	200*	$\text{V}/\mu\text{s}$
dI/dt	Rate of rise of on-state current	From 67% V_{DRM} to 400A Gate source 20V, 20 Ω Rise time 0.5 μs , $T_j = 125^\circ\text{C}$	100	$\text{A}/\mu\text{s}$
$V_{T(TO)}$	Threshold voltage	At $T_{vj} = 125^\circ\text{C}$ - See Note 1	1.25	V
r_T	On-state slope resistance	At $T_{vj} = 125^\circ\text{C}$ - See Note 1	1.33	m Ω

* Higher dV/dt values available, contact factory for particular requirements.

Note 1: The data given in this datasheet with regard to forward voltage drop is for calculation of the power dissipation in the semiconductor elements only. Forward voltage drops measured at the power terminals of the module will be in excess of these figures due to the impedance of the busbar from the terminal to the semiconductor.

GATE TRIGGER CHARACTERISTICS AND RATINGS

Symbol	Parameter	Conditions	Typ.	Max.	Units
V_{GT}	Gate trigger voltage	$V_{DRM} = 5V, T_{case} = 25^{\circ}C$	-	3.0	V
I_{GT}	Gate trigger current	$V_{DRM} = 5V, T_{case} = 25^{\circ}C$	-	200	mA
V_{GD}	Gate non-trigger voltage	$V_{DRM} = 5V, T_{case} = 25^{\circ}C$	-	0.2	V
V_{FGM}	Peak forward gate voltage	Anode positive with respect to cathode	-	30	V
V_{FGN}	Peak forward gate voltage	Anode negative with respect to cathode	-	0.25	V
V_{RGM}	Peak reverse gate voltage		-	5.0	V
I_{FGM}	Peak forward gate current	Anode positive with respect to cathode	-	4	A
P_{GM}	Peak gate power		-	16	W
$P_{G(AV)}$	Mean gate power		-	3	W

ORDERING INSTRUCTIONS

Part number is made up as follows:

MP03 HBT 130 - 18

MP = Pressure contact module
 03 = Outline type
 HBT = Circuit configuration code (see "circuit options" - front page)
 130 = Nominal average current rating at $T_{case} = 75^{\circ}C$
 18 = $V_{RRM}/100$

Examples:

MP03 HBP130-16
 MP03 HBN130-20
 MP03 HBT130-16

Note: Diode ratings and characteristics are comparable with SCR in types HBP or HBN.
 Types HBP or HBN can also be supplied with diode polarity reversed, to special order.

MOUNTING RECOMMENDATIONS

- Adequate heatsinking is required to maintain the base temperature at $75^{\circ}C$ if full rated current is to be achieved. Power dissipation may be calculated by use of $V_{T(TO)}$ and r_T information in accordance with standard formulae. We can provide assistance with calculations or choice of heatsink if required.
- The heatsink surface must be smooth and flat; a surface finish of N6 (32 μ in) and a flatness within 0.05mm (0.002") are recommended.
- Immediately prior to mounting, the heatsink surface should be lightly scrubbed with fine emery, Scotch Brite or a mild chemical etchant and then cleaned with a solvent to remove oxide build up and foreign material. Care should be taken to ensure no foreign particles remain.
- An even coating of thermal compound (eg. Unial) should be applied to both the heatsink and module mounting surfaces. This should ideally be 0.05mm (0.002") per surface to ensure optimum thermal performance.
- After application of thermal compound, place the module squarely over the mounting holes, (or 'T' slots) in the heatsink. Using a torque wrench, slowly tighten the recommended fixing bolts at each end, rotating each in turn no more than 1/4 of a revolution at a time. Continue until the required torque of 5Nm (44lb.ins) is reached at both ends.
- It is not acceptable to fully tighten one fixing bolt before starting to tighten the others. Such action may DAMAGE the module.

MP03 XXX 130 Series

Fig. 9 50/60Hz single phase bridge dc output current vs power loss and maximum permissible ambient temperature for various values of heatsink thermal resistance.

(Note: $R_{th(hs-a)}$ values given above are true heatsink thermal resistances to ambient and already account for $R_{th(c-hs)}$ module contact thermal).

Fig. 9 50/60Hz 3- phase bridge dc output current vs power loss and maximum permissible ambient temperature for various values of heatsink thermal resistance.

(Note: $R_{th(hs-a)}$ values given above are true heatsink thermal resistances to ambient and already account for $R_{th(c-hs)}$ module contact thermal).

PACKAGE DETAILS

For further package information, please contact your local Customer Service Centre. All dimensions in mm, unless stated otherwise. DO NOT SCALE.

Recommended fixings for mounting:	M5 socket head cap screws.
Recommended mounting torque:	5Nm (44lb.ins)
Recommended torque for electrical connections:	8Nm (70lb.ins)
Maximum torque for electrical connections:	9Nm (80lb.ins)
Nominal weight:	950g

Module outline type code: MP03

POWER ASSEMBLY CAPABILITY

The Power Assembly group was set up to provide a support service for those customers requiring more than the basic semiconductor, and has developed a flexible range of heatsink / clamping systems in line with advances in device types and the voltage and current capability of our semiconductors.

We offer an extensive range of air and liquid cooled assemblies covering the full range of circuit designs in general use today. The Assembly group continues to offer high quality engineering support dedicated to designing new units to satisfy the growing needs of our customers.

Using the up to date CAD methods our team of design and applications engineers aim to provide the Power Assembly Complete solution (PACs).

HEATSINKS

Power Assembly has its own proprietary range of extruded aluminium heatsinks. They have been designed to optimise the performance of our semiconductors. Data with respect to air natural, forced air and liquid cooling (with flow rates) is available on request.

For further information on device clamps, heatsinks and assemblies, please contact your nearest Sales Representative or the factory.

Datasheet Annotations:

Dynex Semiconductor annotate datasheets in the top right hand corner of the front page, to indicate product status. The annotations are as follows:-

Target Information: This is the most tentative form of information and represents a very preliminary specification. No actual design work on the product has been started.

Preliminary Information: The product is in design and development. The datasheet represents the product as it is understood but details may change.

Advance Information: The product design is complete and final characterisation for volume production is well in hand.

No Annotation: The product parameters are fixed and the product is available to datasheet specification.

This publication is issued to provide information only which (unless agreed by the Company in writing) may not be used, applied or reproduced for any purpose nor form part of any order or contract nor to be regarded as a representation relating to the products or services concerned. No warranty or guarantee express or implied is made regarding the capability, performance or suitability of any product or service. The Company reserves the right to alter without prior notice the specification, design or price of any product or service. Information concerning possible methods of use is provided as a guide only and does not constitute any guarantee that such methods of use will be satisfactory in a specific piece of equipment. It is the user's responsibility to fully determine the performance and suitability of any equipment using such information and to ensure that any publication or data used is up to date and has not been superseded. These products are not suitable for use in any medical products whose failure to perform may result in significant injury or death to the user. All products and materials are sold and services provided subject to the Company's conditions of sale, which are available on request.
