

# GSM Dual Band Tx\_VCO

## Key Features

- One IC handles GSM900 DCS 1800/  
PCS 1900 bands
- High output power: (17 dBm, 13dBm/  
13dBm)

16 pin QSOP

## Description

The PBL 403 07 is a Dual Band Tx\_VCO for use in GSM dual band terminals.

The resonators for each band are external. The resonator consists of varactor, capacitor and inductor in

series from ground to the VCO resonator pin. The inductor, capacitor and varactor determines the oscillation frequency, and also the tuning range.
