

FEATURES

- **DynamEQ® II flexibility**
- **five programmable parameters**
- **24 dB/oct state variable filter**
- **twin average detectors**
- **handles high input levels**
- **drives class D integrated receivers**

STANDARD PACKAGING

Hybrid typical dimensions:

0.250 in x 0.115 in x 0.120 in
(6.35 mm x 2.92 mm x 3.05 mm)

DESCRIPTION

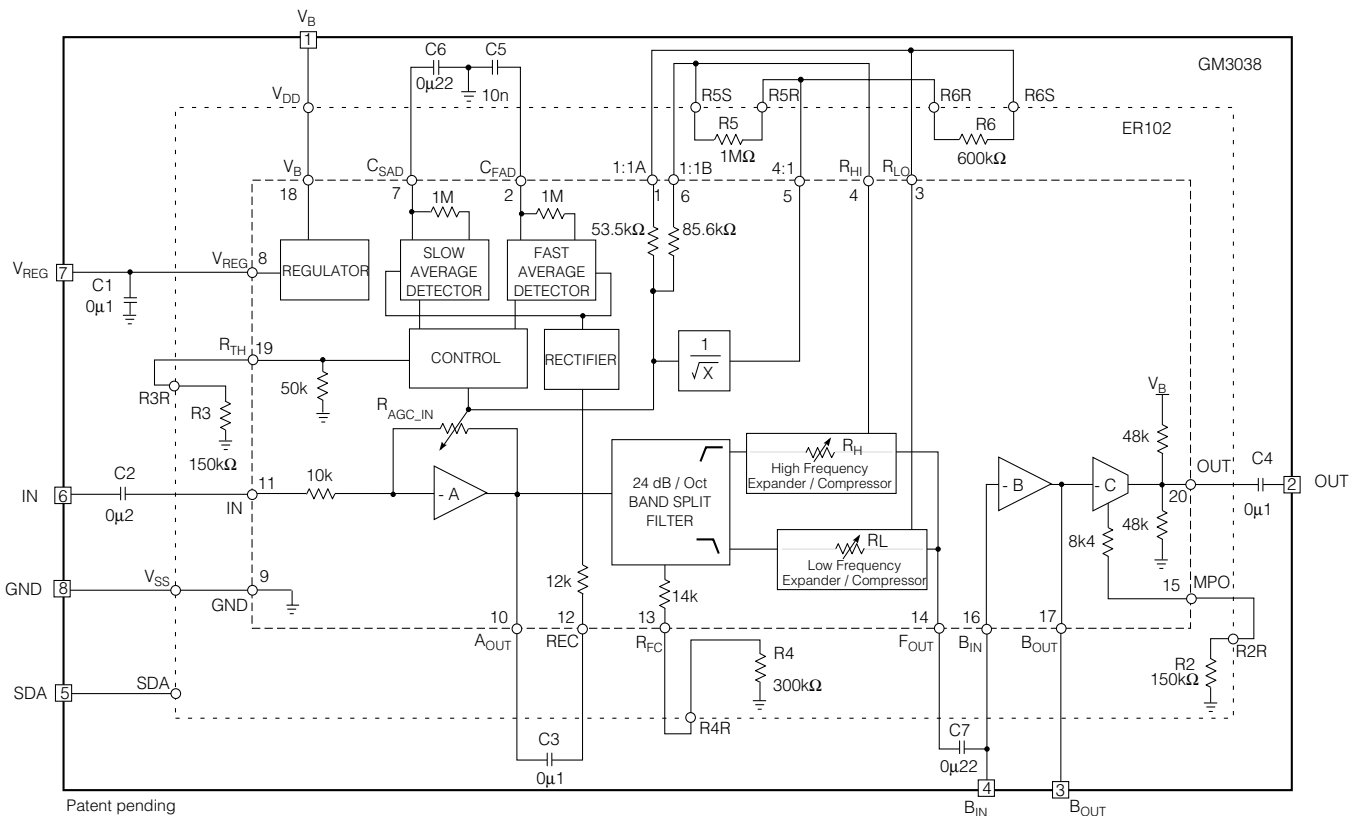

The GM3038 programmable hybrid is composed of a DynamEQ® II Wide Dynamic Range Compression signal processor and the ER102 controller memory chip. The hybrid incorporates 24 dB/oct filtering.

The gain and frequency response are dependent on the user's environment. The Twin Average Detector circuit is optimized for sound quality during normal listening without sacrificing comfort during sudden loud sounds.

The GM3038 features five programmable parameters: independent compression ratio adjustment in the High and Low frequency channels, threshold adjustment, crossover frequency adjustment and MPO adjustment.

The ER102 controller memory chip is supported by a variety of programmers available on the market.

The output stage is designed as a preamplifier for the class D integrated receiver.

PACKAGE DIMENSIONS

Dimensions are in inches.
 Dimensions in parenthesis are in millimetres converted from inches and include minor rounding errors.
 1.0000 inches = 25.400 mm.
 Dimension tolerances ± 0.003 (± 0.08) unless otherwise stated.
 XXXXXX - work order number.
 This hybrid is designed for point-to-point manual soldering.
