HA17474/P

Quad Operational Amplifier

HITACHI

Description

HA17474/P is a quad operational amplifier with provided internal frequency compensation and high performance. It can be applied widely to measuring control equipment and to general use.

Features

- High speed: 1.6 V/μs
- Continuous short-circuit protection
- Low-noise operational amplifiers
- Internal frequency compensation
- Wide operating power supply voltage range: $V = \pm 2 \text{ V}$ to $\pm 20 \text{ V}$
- Pin compatible with HA17324, HA17902

Note: Since these products provide a high slew rate, oscillation may occur due to load capacitance. An allowable capacitor value is minimum at voltage follower.

- 1. Hitachi neither warrants nor grants licenses of any rights of Hitachi's or any third party's patent, copyright, trademark, or other intellectual property rights for information contained in this document. Hitachi bears no responsibility for problems that may arise with third party's rights, including intellectual property rights, in connection with use of the information contained in this document.
- 2. Products and product specifications may be subject to change without notice. Confirm that you have received the latest product standards or specifications before final design, purchase or use.
- 3. Hitachi makes every attempt to ensure that its products are of high quality and reliability. However, contact Hitachi's sales office before using the product in an application that demands especially high quality and reliability or where its failure or malfunction may directly threaten human life or cause risk of bodily injury, such as aerospace, aeronautics, nuclear power, combustion control, transportation, traffic, safety equipment or medical equipment for life support.
- 4. Design your application so that the product is used within the ranges guaranteed by Hitachi particularly for maximum rating, operating supply voltage range, heat radiation characteristics, installation conditions and other characteristics. Hitachi bears no responsibility for failure or damage when used beyond the guaranteed ranges. Even within the guaranteed ranges, consider normally foreseeable failure rates or failure modes in semiconductor devices and employ systemic measures such as fail-safes, so that the equipment incorporating Hitachi product does not cause bodily injury, fire or other consequential damage due to operation of the Hitachi product.
- 5. This product is not designed to be radiation resistant.
- 6. No one is permitted to reproduce or duplicate, in any form, the whole or part of this document without written approval from Hitachi.
