DESCRIPTION:

The FCT82xT series is built using an advanced dual metal CMOS technology. The FCT82xT series bus interface registers are designed to eliminate the extra packages required to buffer existing registers and provide extra data width for wider address/data paths or buses carrying parity. The FCT821T are buffered, 10-bit wide versions of the popular FCT374T function. The FCT823T are 9-bit wide buffered registers with Clock Enable (\overline{EN}) and Clear (\overline{CLR}) – ideal for parity bus interfacing in high-performance microprogrammed systems. The FCT825T are 8-bit buffered registers with all the FCT823T controls plus multiple enables ($\overline{OE1}$, $\overline{OE2}$, $\overline{OE3}$) to allow multi-user control of the interface, e.g., \overline{CS} , DMA and RD/ \overline{WR} . They are ideal for use as an output port requiring high IOH/IOH.

The FCT82xT high-performance interface family can drive large capacitive loads, while providing low-capacitance bus loading at both inputs and outputs. All inputs have clamp diodes and all outputs are designed for low-capacitance bus loading in high-impedance state.

PIN DESCRIPTION

Names	I/O	Description
D _I	I	The D flip-flop data inputs.
$\overline{\text{CLR}}$	I	When the clear input is LOW and $\overline{\text{OE}}$ is LOW, the Q _I outputs are LOW. When the clear input is HIGH, data can be entered into the register.
CP	I	Clock Pulse for the Register; enters data into the register on the LOW-to-HIGH transition.
Y _I	O	The register 3-state outputs.
$\overline{\text{EN}}$	I	Clock Enable. When the clock enable is LOW, data on the D _I input is transferred to the Q _I output on the LOW-to-HIGH clock transition. When the clock enable is HIGH, the Q _I outputs do not change state, regardless of the data or clock input transitions.
$\overline{\text{OE}}$	I	Output Control. When the $\overline{\text{OE}}$ input is HIGH, the Y _I outputs are in the high-impedance state. When the $\overline{\text{OE}}$ input is LOW, the TRUE register data is present at the Y _I outputs.
