#### AMP M/A-COM

# Low Cost SMT High Pass Filter 800-3000 MHz

M/A-COM's FL05-0001-G is an IC-based monolithic high pass

filter in a low cost SOIC-8 plastic package. This filter is ideally

suited for applications where small size, low cost and low loss are

Typical applications include base station switching networks and

portable phones where size and PCB real estate are at a premium.

The FL05-0002-G is fabricated using a passive-integrated circuit process. The process features full-chip passivation for increased

#### Features

- Small Size and Low Profile
- Industry Standard SOIC-8 SMT Plastic Package
- Superior Repeatability
- Typical Insertion Loss 0.5 dB
- Typical Rejection 20dB
- 2 Watt Power Handling
