SONET/SDH TRANSMITTER & RECIEVER

DESCRIPTION

This product is designed to provide high optical performance for SDH STM-64/SONET OC-192. Transmitter uses cooled laser in a butterfly package module with drivered by specific integrated circuit. Receiver uses PD preamp-module (butterfly package module) and integrated circuits for reshaping, retiming and regenerating optical signal.

FEATURES

- Full SONET/SDH line up
- K connector interface
- -5.2V,+5V power supply target, -2.2V(TX only)
- Case Temp. Range: 10 to 65°C
- Clock recovery and digital alarm function.

APPLICATION

Short haul and long haul telecommunication systems for SDH STM64 / SONET OC-192.

ABSOLUTE MAXIMUM RATINGS

Stress below listed absolute maximum rating may cause permanent damage to the transmitter and receiver.

This is a stress only and functional operation of the transceiver at these or any other conditions in excess of those given in the operational sections of this data sheet is not implied.

Exposure to Absolute Maximum Rating for extended periods may affect transmitter and receiver reliability.

Tc=25°C

Parameters	Symbol	Ratings	Unit
Supply voltage	Vcc	+5.3	V
	Vee	-6.0	V
	Vtt	-2.4	V

ELECTRICAL CHARACTERISTICS

All parameters are specified over the operating case temperature.

Measurement conditions are at 9953.28Mb/s+/-20ppm, NRZ PN²³-1 and 50%duty cycle data signal.

V_{cc}=+5.0V+/-5%, V_{ee}=-5.2V+/-5%, V_{tt}=-2.2V+/-0.1V, T_c=10 to 65 °C, Using a PRBS 2²³-1 pattern with a 50%Mark ratio, unless otherwise noted.

NOTE

NOTE1: Input interface

NOTE2: Shut down interface

NOTE3: Laser Degradation Alarm / Power out of range Alarm / LD temperature out of range Alarm

Laser Degradation Alarm (DEG) sets when the bias current is at least 70% higher than the maximum initial value allowed .

Alarm active: TTL LOW

Power out of range Alarm (ORA), sets when the output optical output power is 3dB(typ.) less than the initial optical output level.

Alarm active: TTL LOW

Laser Over Temperature Alarm (LOT), sets when the temperature of LD increase or decrease more than 15deg.C from the initial temperature.

Alarm active: TTL LOW
