

## REMOTE-CONTROL INTERFACE

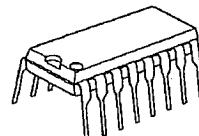

### ■ GENERAL DESCRIPTION

The NJM2145 is a remote-control interface for television, VCR, receiver, and others.

Some items are connected through the OUT2(two-way) terminal, then all of items are controlled when the control signal from any remote-control commander is transmitted to one of items.

If a few OUT2 terminals are open, the NJM2145 operates normally by its error protection circuit.
