High-voltage soft-recovery rectifier

BY505

FEATURES

- Glass passivated
- High maximum operating temperature
- Low leakage current
- Excellent stability
- Soft-recovery switching characteristics
- Compact construction.

APPLICATIONS

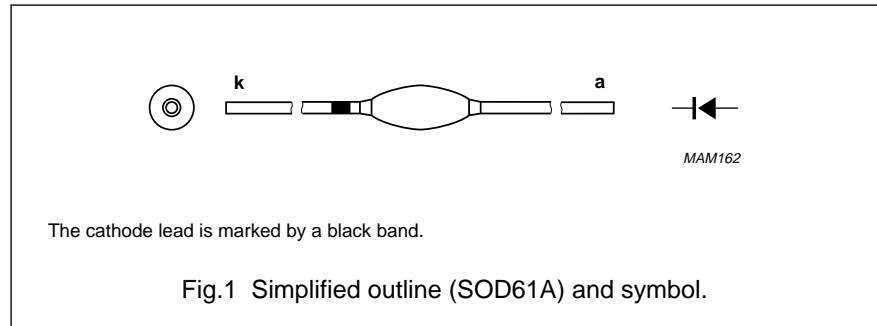

- High-voltage applications for:
 - High frequencies
 - Switching applications.

DESCRIPTION

Rugged glass package, using a high temperature alloyed construction. This package is hermetically sealed and fatigue free as coefficients of

expansion of all used parts are matched.

The package is designed to be used in an insulating medium such as resin, oil or SF6 gas.

LIMITING VALUES

In accordance with the Absolute Maximum Rating System (IEC 134).
