

# 1 Amp Low Dropout Positive Voltage Regulator

The PJ1117 Series of high performance positive voltage regulators are designed for use in applications requiring low dropout performance at full rated current. Additionally, the PJ1117 Series provides excellent regulation over variations due to changes in line, load and temperature. Outstanding features include low dropout performance at rated current, fast transient response. The PJ1117 Series are three terminal regulators with fixed and adjustable voltage options available in popular packages.

## FEATURES

- Low dropout voltage 1.3 V max.
- Full current rating over line and temperature
- Fast transient response
- $\pm 2\%$  Total output regulation over line, load and temperature
- Adjust pin current max 120  $\mu$  A over temperature
- Line regulation typical 0.015%.
- Load regulation typical 0.05%.
- Fixed/adjustable output voltage
- TO-220, TO-263, TO-252 & SOT-223 package
