**PACKAGE DIMENSIONS**

**DESCRIPTION**

The T-1¼ HLMP-4700 Series and T-1 HLMP-1700 Series are direct pin-for-pin replacements for the Hewlett-Packard lamps with the same part numbers. All devices are tinted diffused with a medium-wide viewing angle. The design of the LED chips is optimized for low current applications and is far superior in Luminous Intensity compared to standard LED lamps at very low current.

These low current lamps are primarily intended for direct view.

**FEATURES**

- Very low power — 4 mW
- 2 mA drive from low power TTL or CMOS
- All three colors
- Power savings in portable equipment
- Sturdier leads for easy assembly
- Both T-1¼ and T-1
- Use MP52 panel mounting grommet with HLMP-4700, HLMP-4719 and MV2454

**APPLICATIONS**

- Portable battery driven digital or linear electronic equipment like test instruments, robots and toys
- Multiple lamp applications to reduce power drain by 5 to 10 times and decrease power supply size and cost as in phones, PBX and signs
