### Notes

- The RP15 E-series requires a minimum of 10% load on the output to maintain specified regulation. Operation under no-load condition will not damage these devices, however they may not meet all listed specifications.
- Simulated source impedance of 12uH. 12uH inductor in series with +Vin.
- The ON/OFF control is an optional function. There are positive logic and negative logic. The pin voltage is referenced to the negative input.  
To order positive logic ON-OFF control add the suffix ' P ' (Ex: RP15-2405SF/P).  
To order negative logic ON-OFF control add the suffix ' N ' (Ex: RP15-2405SF/N).
- BELLCORE TR-NWT-000332. Case I: 50% Stress, Temperature at 40°C (Ground fixed and controlled environment).
- Heat sink is optional and P/N: 7G -0020A. The thermal impedance is 10°C/Watt for natural convection.
- Maximum value at nominal input voltage and full load.
- Typical value at nominal input voltage and full load.
