

### HIGH-PERFORMANCE PRODUCTS

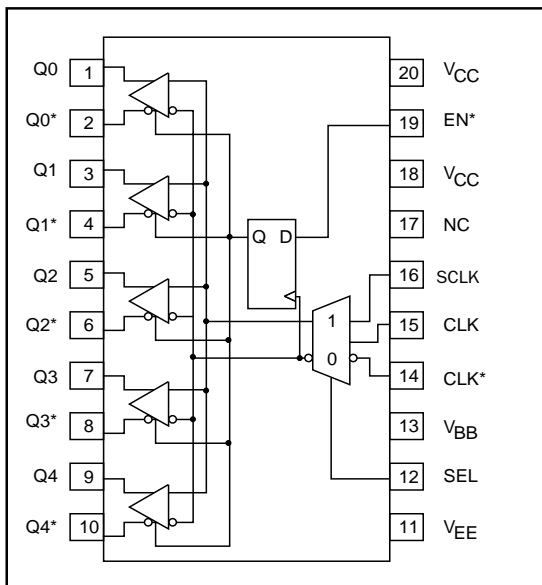

#### Description

The SK10/100EL14W is a 1:5 Clock Distribution Chip designed specifically for low skew clock distribution applications. This device is fully compatible with MC100EL14 and MC100LVEL14.

The device can be driven by either differential or single-ended ECL/PECL input signals. The SK10/100EL14W provides a  $V_{BB}$  output for either single-ended use or DC bias for AC coupling to the device.  $V_{BB}$  is an output pin and should be used as a bias for the EL14W as its current sink/source capability is limited. Whenever used,  $V_{BB}$  should be bypassed to VCC via a 0.01  $\mu$ F capacitor.

The EL14W features a multiplexed clock input to allow for the distribution of a lower speed scan or test clock along with the high speed system clock. When LOW (or left open and pulled LOW by the input pulldown resistor) the SEL pin will select the differential clock input. The Common Enable pin (EN\*) is synchronous so that the outputs will only be enabled/disabled when they are already in the LOW state. This avoids the chance of generating a runt clock pulse when the device is enabled/disabled as can happen with an asynchronous control. The internal flip-flops are clocked on the falling edge of the input clock; therefore, all associated specification limits are referenced to the negative edge of the clock input.

#### Functional Block Diagram

#### Features

- Extended Supply Voltage Range: ( $V_{EE} = -5.5V$  to  $-3.0V$ ,  $V_{CC} = 0V$ ) or ( $V_{CC} = +3.0V$  to  $+5.5V$ ,  $V_{EE}=0V$ )
- High Bandwidth Output Transition
- Max. 50 ps Output-to-Output Skew (Typ. 30 ps)
- $V_{BB}$  Output
- Synchronous Enable/Disable
- Multiplexed Clock Input
- 75 K $\Omega$  Internal Input Pulldown Resistors
- New Differential Input Common Mode Range
- Fully Compatible with MC100EL14 and MC100LVEL14
- ESD Protection of >4000 V
- Industrial Temperature Range:  $-40^{\circ}C$  to  $+85^{\circ}C$
- Available in 20-Pin SOIC (150 mils) Package

#### Pin Descriptions

Pin	Function
CLK, CLK*	Differential Clock Inputs
SCLK	Scan Clock Input
EN*	Sync Enable
SEL	Clock Select Input
$V_{BB}$	Reference Output Voltage
Q0-Q4, Q0*-Q4*	Differential Clock Outputs

Function Table

CLK	SCLK	SEL	EN*	Q
L	X	L	L	L
H	X	L	L	H
X	L	H	L	L
X	H	H	L	H
X	X	X	H	L*

\* On next negative transition of CLK or SCLK

20 Pin SOIC Package

Millimeters

DIM	MILLIMETERS	
	MIN	MAX
A	1.35	1.75
A1	0.10	0.25
B	0.33	0.51
C	0.19	0.25
D	4.80	5.00
E	3.80	4.00
e	1.27 BSC	
H	5.80	6.20
h	0.25	0.50
L	0.40	1.27
θ	0°	8°

NOTES:

1. Dimensions and tolerances per ANSI Y14.5M, 1982.
2. Controlling dimension: millimeter.
3. Dimensions A and B do not include mold protrusion.
4. Maximum mold protrusion 0.150 (0.006) per side.
5. Dimension D does not include Dambar protrusion. Allowable Dambar protrusion shall be 0.13 (0.005) total in excess of d dimension at maximum material condition.

## HIGH-PERFORMANCE PRODUCTS

## AC Characteristics (continued)

## Notes:

1. 10EL circuits are designed to meet the DC specifications shown in the table after thermal equilibrium has been established. The circuit is in a test socket or mounted on a printed circuit board and transverse airflow greater than 500 lfpm is maintained. Outputs are terminated through a 50Ω resistor to VCC -2.0V.
2. 100K circuits are designed to meet the DC specification shown in the table where transverse airflow greater than 500 lfpm is maintained.
3. Voltages are referenced to VCC = 0V.
4. Skews are specified for identical LOW-to-HIGH or HIGH-to-LOW transitions.
5. Minimum input swing for which AC parameters guaranteed.
6. CMR range is referenced to the most positive side of the differential input signal. Normal operation is obtained if the high level falls within the specified range and the peak-to-peak voltage lies between  $V_{PP(\min)}$  and 1V. The lower end of the CMR range varies 1:1 with VEE and is equal to VEE + 1.3V for  $V_{PP} < 500$  mV, and VEE + 1.5 for  $V_{PP} > 500$  mV.
7. For standard ECL DC specifications, refer to the ECL Logic Family Standard DC Specifications Data Sheet.
8. For part ordering descriptions, see HPP Part Ordering Information Data Sheet.
