

MI-ComPAC™

Military DC-DC Power Supplies

Product Highlights

The MI-ComPAC is a complete single, dual, or triple output DC-DC power supply that delivers up to 300W from inputs of 28Vdc or 270Vdc.

The MI-ComPAC meets the conducted emissions and conducted susceptibility specifications of MIL-STD-461C/D/E and offers complete input transient, surge, and spike protection to the most severe levels of MIL-STD-1275A, 704A.

Reverse polarity protection and over/undervoltage lockout provide additional safeguards against potentially damaging line conditions. The MI-ComPAC also features a master disable.

Disable Current

- 4mA DC minimum for 1-up CompPAC
- 8mA DC minimum for 2-up CompPAC
- 12mA DC minimum for 3-up CompPAC

The MI-CompPAC incorporates an optically isolated master disable input which will shut down the MI-CompPAC when a current is driven through the disable terminals.

- Thermal impedance, chassis-to-air, is provided for 1-up, 2-up and 3-up MI-CompPAC package configurations as a function of air flow.
- Case temperature = (total power dissipated x thermal impedance) + ambient temperature.
- Watts dissipated per output = (output power ÷ efficiency) - output power.
